Suggestions For the Use of The Art Index

Arrangement

Authors and subjects are arranged in one alphabetical file. Under authors and subjects, titles are filed by the first word, initial articles being disregarded. Under personal names titles *by* an author precede those *about* him. Subdivisions of a subject are arranged alphabetically under the subject, country subdivisions following the form subdivisions.

Collation

Following the title are noted, by abbreviations, the kind of illustrations which accompany the article, also any bibliographies or bibliographical footnotes of importance.

Book Reviews

Book reviews are indexed under the author of the book and also under one or more subjects according to the content of the review.

Exhibitions

An exhibition of an individual artist is indexed under the artist's name whenever biographical or critical information is given.

Illustrations

Titles of works of art accompanying the text of an article are listed in a note. Individual works by an artist, without text, are arranged by titles alphabetically under the subdivision Reproductions under the name of the artist. Two or more in the same magazine are listed in one entry, beginning with the first title. Titles used are those given in the periodicals; but, when in more than one language, preference is given the English form. Combined entries are made for the same picture in different periodicals.

References

See references have been made from various forms of personal names and subject headings to authorized forms. *See also* references are made from subjects to related subjects.
